Marc....

Please write a supplemental report on the shooting of McMillan. Start it by stating that I asked you to go into more detail. Please go into as much detail as you can on exactly what the parties said to you (specifically and not just over view paraphrasing). Also please describe your observations as to the indicators of intoxication of Daniel Nordmark and any statements that he made to you about being intoxication or how much and how long he and the victim had been drinking.

The mother of the victim has gotten all of the reports and the photographs and she is not satisfied with the investigation and has stated to me that she "will see Nordmark behind bars" and has complained to the office of State Senator Curt Kaiser who called the head of the FDLE in Tallahassee and he called the Special Agent in Charge of the Tampa Office who called the Chief.

I have met with the State Attorney's Office informally and they agree with me that this does not rise to the level of Culpable Negligence and therefore Culpable Negligence Manslaughter. This case is not going away and has both civil and administrative repercussions as it should. We will be in court over this case in the future. Please just leave me a draft of your report on my desk. You might want to read my supplements which are attached to this note....thanks Mack
